GROWER OF

*The Leading and Prizewinning
Varieties of the World*

PRICES REASONABLE

FOR

1932

Stock clean and vigorous
full of surprising beauty

The bulbs make a great
difference-

Try some of mine and
be convinced

Orders filled as received

VARIETIES

Many of these varieties are rare and of recent introduction, so will not be able to supply all who will want them this season, so advise to order early, as orders will be filled as received.

ABOUT SIZES. As you will see in the price list the bulbs are listed in six sizes. If you want the best blooms get No. 1. As a rule these will produce the biggest spikes and blooms. The smaller the bulb the smaller the plant and bloom. No. 3 will give fine blooms in most varieties. Even No. 4 will produce good blooms in many varieties and Nos. 5 and 6 will bloom in some varieties, but will be much smaller.

Prices will compare favorably with other reliable growers and if I have some listed a little higher I make up the difference by giving some extra bulbs so don't let a few pennies scare you out.

I also include one or more varieties free to you for good measure, according to the amount of your order.

TERMS

Cash, money order, or check should accompany orders below \$2.00; over this amount 25% of the amount will hold order until time of shipment, when balance may be sent, or bulbs sent C. O. D.

It does not pay to send small orders C. O. D. since the consumer has to pay these charges.

DISCOUNT (Cash With Order)

Orders of \$5 to \$10 you may select 5 per cent. in bulbs.
Orders of \$10 to \$20 you may select 10 per cent. in bulbs.
Orders of \$20 to \$50 you may select 12 per cent. in bulbs.
Orders over \$50 you may select 15 per cent. in bulbs.

In this way you can get some of those nice ones that you want and it will save me a lot of work later on.

IMPORTANT

My bulbs are grown under natural conditions, not being forced the way most of the large growers are doing, therefore you get bulbs full of vigor and pep that will give you good results even from small sizes as it makes a great deal of difference as to how bulbs are grown.

PLANTING

Plant large sizes about 4 inches deep, 4 to 6 inches apart in the row and about 12 to 18 inches between the rows, smaller sizes a little less in proportion, or you may plant in groups, but away from trees and shrubbery and the best time to plant is from April 15 to June 15.

PRICES FOR GROUP No. 1
